### **DETAILED ACTION**

Applicant's arguments, see paper, filed 3/22/10, with respect to the rejection(s) of claim(s) 10,16,18,30-35 under 35 USC 103(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made below.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10,16,18,30-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Biro (GB 2228941; 19/12/90) and Sato et al. (JP 08157819; 6/18/96). Biro teaches a composition comprising an instant compound of formula II, fertilizer and water (abstract). Sato et al. teach a composition comprising a fertilizer, an instant compound of formula II and water (abstract). Fertilizer composition are applied to plants. Neither Biro nor Sato et al. teach an invention comprising 50 – 500 ppm of compound of formula II. Also, neither reference teaches the instant surfactant. However it is obvious to include a variety of surfactants in a fertilizer composition. Thus, absent of a showing of unexpected results for instantly claimed surfactant, any surfactant would render the instant surfactants obvious. Surfactants aid with the absorption of the active by the plant. It would have been obvious to determine the optimum amount of compound of

formula II. One would have been motivated to do this in order to make the most efficient fertilizer composition that would promote plant growth.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
